

## GREEN STATEMENT

Commitment to  
Sustainability

### Homeland Vinyl: We're greener than you think!

At Homeland Vinyl Products, we are striving to minimize our environmental footprint and contribute to a more sustainable future. Our vinyl fencing materials offer long-term durability and low maintenance, reducing the need for chemical treatments, paints, and frequent replacements. Additionally, we are committed to continuously improving the way we manufacture, source, and recycle our products.

- **Recyclability and Eco-Friendly:** Our vinyl fence material is recyclable. We reprocess and reuse our own internally generated scrap to greatly reduce waste. We also take back old vinyl fence materials to grind and reuse as our customers replace old fences with new fences. This full life cycle recycling approach supports sustainability and reduces landfill waste.

- **Energy-Efficient Manufacturing:** We select energy-efficient technologies and processes to minimize waste, reduce emissions, and lower our carbon footprint throughout the production cycle when possible. We continuously seek ways to reduce energy consumption throughout our facilities.

- **Low-Maintenance, Long Life Cycle:** Vinyl fencing requires no painting, staining, or chemical treatments that utilize VOCs, significantly reducing environmental impact over its lifetime that often exceeds 20+ years. Its durability means fewer replacements and less landfill waste.

- **Smart Packaging:** Our goal is to use recyclable packaging materials and work to minimize excess packaging wherever feasible.

- **Sustainable Partnerships:** We seek to work with suppliers who share our commitment to sustainability, ensuring ethical sourcing and responsible business practices across our supply chain.

We believe that strong, beautiful fences can also support a cleaner, greener future. Homeland Vinyl Products is proud to be part of the solution - creating products that are as environmentally responsible as they are enduring.
